

Introduction to MATLAB Computing

Nick A. Battista
Dept. of Mathematics and Statistics
The College of New Jersey (TCNJ)
<http://battistn.pages.tcnj.edu>

These are the scripts (.m-files) that go along with my video tutorials on how to compute using MATLAB. Please note that currently all the tutorials and scripts are in their *rough draft* phase.

Tutorial 1: <https://youtu.be/po8-oMZKGwA>

- MATLAB Programming environment, command window operations, defining variables, constructing vectors and matrices

Tutorial 2: <https://youtu.be/b-Ah5ij8BPA>

- MATLAB scripting, writing scripts, calling scripts in other scripts, plotting, introduce a for-loop.

Tutorial 3: <https://youtu.be/UDvocnVTWyM>

- Practicing MATLAB scripting, comparing for-loops and while-loops
